

SHREENIVAS JOSHI

GENAI ARCHITECT · AI LEAD · AI ENGINEERING MANAGER

Gurugram, India | +91 8105175840 | srinivasjoshi11@gmail.com
linkedin.com/in/shreenivas-joshi | github.com/shrinivasait

GenAI architect and engineering leader with 5 years designing and shipping production LLM systems — enterprise agentic AI, RAG platforms, and real-time multimodal voice agents. Currently own end-to-end AI architecture and delivery at HB Software Solutions, leading an 18-member engineering team. Previously built an AI function from zero as Head of AI at a startup, raising ~USD 50K in cloud grants from AWS, Google, and Azure plus ₹3 Cr (~USD 360K) in incubation funding. Hands-on across the full GenAI lifecycle: LLM fine-tuning and continued pretraining, agent orchestration, retrieval architecture, microservice design, MLOps, and evaluation — from client requirements through post-deployment benchmarking.

CORE SKILLS

GenAI & LLM Systems — LLM fine-tuning & continued pretraining (LLaMA, BERT, Mamba), agentic AI & task orchestration, RAG architecture, LangChain, vector search (FAISS), embeddings, prompt engineering, LLM evaluation & benchmarking, multimodal voice (STT/TTS), Stable Diffusion, NLP

AI & System Architecture — Enterprise AI solution design, microservice architecture, REST APIs (FastAPI, Flask, Django), real-time low-latency voice pipelines, scalable training & inference infrastructure, edge deployment, computer vision (object detection, semantic segmentation, OCR/ICR)

Platform & MLOps — AWS (SageMaker, Bedrock, Lambda, Glue, S3, EC2), Azure AI Studio, GCP (Vertex AI, BigQuery), Docker, Git, CI/CD, model monitoring

Engineering — Python, PyTorch, TensorFlow, Hugging Face Transformers, spaCy, OpenCV, Pandas, NumPy, Streamlit

Leadership — Team building & mentoring, technical roadmapping, client engagement & pre-sales, cross-functional delivery, Agile, internal enablement & training

EXPERIENCE

HB Software Solutions India Pvt. Ltd. — Lead AI

Aug 2025 – Present

Own end-to-end GenAI architecture and delivery for enterprise conversational and agentic products; lead an 18-member AI engineering team.

- Architected enterprise-grade LLM and **agentic AI systems** for automated reasoning and task orchestration, now running in production for enterprise clients.
- Designed a unified **multimodal voice architecture** integrating STT, TTS, and LLM reasoning into a single framework, sustaining **650–800 ms** end-to-end response latency in live conversational sessions.
- Defined the **microservice reference architecture and MLOps pipelines** that standardized model training, deployment, and monitoring across the team.
- Fine-tuned **domain-specific LLMs** on enterprise datasets, improving contextual accuracy and response precision, validated against an internal benchmark suite.
- Built the org's **LLM evaluation and benchmarking framework** covering accuracy, interpretability, and regression tracking across production models.
- Mentor engineers across the team on GenAI product architecture and prompt engineering; run internal workshops driving responsible AI adoption org-wide.

Basal Analytics Pvt. Ltd. — Head of AI

Jun 2022 – Jul 2025

First AI hire at an analytics startup; built the AI function — team, architecture, and product — from zero, growing the team from 6 to 10 engineers.

- Established the company's AI practice and **architected its first AI-driven product end to end**, from research through production.
- Secured **~USD 50K in cloud grants** (AWS ~\$20K, Microsoft Azure ~\$25K, Google ~\$5K) and **₹3 Cr (~USD 360K)** in incubation funding by authoring and presenting the company's AI implementation strategy.
- Architected scalable **training and evaluation infrastructure** that shortened experiment-to-decision cycles for the AI team.
- Grew AI-enabled analytics offerings that increased customer acquisition by **30%**.
- Delivered numerous client proofs-of-concept end to end — from first conversation to implementation — converting several into paid engagements.
- Recruited and led a team of 10 engineers across research and delivery; introduced documentation and review standards still in use.
- Partnered with AWS, Microsoft, and Google programs to bring state-of-the-art AI tooling into the product stack.

MC&ME Techserve Pvt. Ltd. — Deep Learning Engineer

Oct 2021 – May 2022

Computer vision for geospatial defense applications.

- Improved image recognition accuracy by **25%** by optimizing deep neural network architectures for defense imagery.
- Reduced false positives in object detection by **30%**; built semantic segmentation tooling for terrain analysis that contributed to 20% faster mission response times.
- Led integration of ML models with GIS data pipelines, deploying to high-stakes operational environments.

SELECTED GENAI PROJECTS

- Enterprise RAG Sales Assistant (US enterprise client)** — Architected and delivered a production RAG system using LangChain, Meta-LLaMA 3, FAISS, and custom embeddings over large-scale client document sets. Led the delivery team through planning and execution, improving retrieval accuracy and materially cutting sales-team lookup time.
- Real-Time AI Phone-Call Price Negotiator** — Designed the end-to-end voice-agent architecture combining STT, TTS, and LLM reasoning to negotiate with human agents over live phone calls via Twilio, integrated with the client's CRM — sustaining 650–800 ms round-trip response latency in live negotiations.
- MedicalGPT (B2C)** — Led development of a LLaMA-based medical assistant through continued pretraining on unstructured clinical text plus instruction fine-tuning. Owned training, preprocessing, evaluation, and production deployment on the client's website.
- Virtual Trial Room MVP (e-commerce)** — Delivered a Stable Diffusion–based virtual try-on MVP with custom preprocessing, leading a team of engineers and designers across model, backend, and platform integration.

EDUCATION

- B.E., Electronics & Communication Engineering — Acharya Institute of Technology** 2017 – 2021
12 years of full-time formal education completed prior to university (SSLC and PUC, Karnataka State Board).
